

Solar energy technology is a technology for collecting sun energy by means of devices called solar panels, to transform this energy into sinusoidal electric strong power, to store this electric power for a later use in sun absence

Reseaux-Plexus installs this technology for the domestic and industrial needs. The powers (amperages) installed as well as the approximate and negotiable prices are:

Powers (amperage)

1.1 KW (5 Ampere)

2.2 KW (10 Ampere)

3.3 KW (15 Ampere)

4.4 KW (20 Ampere)

5.5 KW (25 Ampere)

20 KW (30 Ampere TRI)

Rate

FROM 250 000 FCFA TO 2 000 000 FCFA

FROM 500 000 FCFA TO 3 500 000 FCFA

FROM 1 000 000 FCFA TO 5 500 000 FCFA

FROM 2 000 000 FCFA TO 7 500 000 FCFA

FROM 3 500 000 FCFA TO 9 500 000 FCFA

FROM 6 000 000 FCFA TO 20 500 000 FCFA

Solar panels installed have a 25 years life

Reseaux-Plexus also installs Emergency power systems of very great duration (2-7 days). The Emergency power systems enters automatically in service in the event of a general power black out by the national utility supplier.
