

## Energy Cut, Energy Increase and Savings...

During economic crises, business closures as well as during economic growth, you have the opportunity to save on your electricity bills.

ElectricityInvoice.com Web software will allow you to make an energy audit/inventory of your electrical and electronic equipment and will assist you in reducing your electricity consumption.

It will allow you to analyze your electricity bills and to choose a new and cheaper contract with your electricity supplier when it is difficult:

- To reduce your power consumption as you need it.

- To install unprofitable energy reduction devices or to follow overwhelming and weaning diets.

- To use alternative energy sources whose production capacities are insignificant for your needs.

In Countries, States or Provinces where applicable, will make a **comparative study of different tariffs and others commercial data** in order to choose an optimal and economical solution **that best suits your consumptions curves**; just in few mouse clicks.

ElectricityInvoice.com will enable you to localize and to correct your energy waste sources, to rebalance your energy needs and to size efficiently your electric park as well as your power capacitor banks, in order to save 10% to 70% on your invoices according to your case.

## Forecasts...

It is important to forecast the cost of your electricity bills in order to avoid cash flow surprises, additional late fines and fees. **ElectricityInvoice.com** will enable you:

- to do your own metering and recording.

- to monitor your electricity consumption.

- to **pre-calculate** your «bill» in real time before the **monthly** or **bimonthly** bill from your official electrical energy supplier.

- To early detect consumption penalties like bad power factor, exceeding subscribed power, etc..

## Analysis and Optimizations...

With private smart meters, remote metering and internet, ElectricityInvoice.com offers dashboards, multi-parameter real-time graphs, budget monitoring, budget overspending alerts and many advanced optimizations.

## References...

ElectricityInvoice.com is an updated, secure and easy to use software, running on the internet. **ElectricityInvoice.com** was created by former IEEC, VRA and BC Hydro engineers.

## Costs of our services ... 1 à 2% of your bills

Targets	Subscription tariff	Monitoring tariff	Annual fees on money saved
High-voltage consumers	400 + AAT(*) /100 GHS	100 GHS / month	30%
Low voltage consumers	8+ AAT(*) /100 GHS	2 GHS / bimonthly	0%

(\*) AAT: All added taxes of last 12 electricity bills
